SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using the MERN stack (MongoDB, Express, React, Node.js) and PHP. Expert in developing dynamic service marketplaces with role-based authentication, efficient state management using Context API, and scalable UI components. Skilled in delivering clean, maintainable code and implementing real-world features like admin panels, secure user management, and cloud media integration.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive UI Design

Backend Development: Node.js, Express.js, Core PHP, Authentication (JWT & Sessions), Role-Based Access Control (RBAC)

Database & Cloud: MongoDB (Mongoose), MySQL, Cloudinary API

Web Technologies: REST API Integration, CRUD Operations, JWT, Bcrypt.js

Tools / Platforms: VS Code, Git/GitHub, XAMPP, Postman, Render/Vercel

PROJECTS

PoojaConnect – Service Marketplace Platform | [GitHub Repo](#)

- Engineered a full-stack MERN application connecting spiritual service providers (Pandits) with users through a robust service marketplace.
- Implemented Role-Based Access Control (RBAC) and automated redirection logic to ensure Pandits complete professional profiles before accessing dashboards.
- Integrated Cloudinary API for high-quality media management and utilized JWT and Bcrypt.js for secure, encrypted user authentication.
- Designed a responsive, user-centric interface using Tailwind CSS and managed complex application states using React Context API.

E-Learning Web Application (LearnSphere)

- Developed a full-stack E-Learning platform using Core PHP and MySQL with a modular architecture for course management.
 - Secured user access using PHP sessions and PDO prepared statements to mitigate SQL injection risks.
 - Built interactive engagement features including course playlists, bookmarks, and a commenting system for enhanced learner interaction.
 - Optimized search functionality and MySQL queries to ensure high performance and fast data retrieval for courses and tutors.
